**Level above which ground is expected to be frozen/snow is expected to settle.*

Meteorologist's View

Note the sub-zero "feels like" temperatures on high ground. This is quite realistic as it will feel bitterly cold in the wind.

Recent rainfall: measured at Neuadd: altitude 353m

Recorded at	Last 24 hours:	Last 48 hours:	Last 72 hours:

Forecast for Saturday 26 Sep 2020

Weather: The early hours will be very cold, with a grass frost quite likely in a few sheltered spots. Skies will be mostly clear, but there is a small chance of a light rain shower. During the day, there will be widespread sunshine and excellent visibility. Winds will be less strong than Friday, but still northerly, so it will feel rather cold. The odd rain shower is just possible during the morning.

Maximum wind: Northerly 20 mph with gusts of 35 mph on the summits.

Chance of cloud free mountain/hill tops above 600m: 90% with cumulus clouds well above the mountain tops. After 5pm, reducing to 60% with some lower cloud later.

Visibility: Excellent most of the time, with very good views of hills 40km or more away. Perhaps reducing to 100m on the summits after 5pm where any cloud drops below the summits.

Temperature: **Valleys:** 5 Celsius at dawn, rising to 12 Celsius in the afternoon.
At 600m: 1 Celsius first thing, rising to 6 Celsius in the afternoon.
Freezing level: 700m at dawn rising well above the summits later.
